

KAIMANAWA HERITAGE HORSES

Buying a Wild Kaimanawa Horse Direct From the Muster

Muster Application Form - 2022

The approximate date of the muster is the end of April, whenever the weather conditions are favourable.

If you think you would like to get a Kaimanawa Wild Horse from the muster you need to carefully consider the following information. We have endeavoured to make this information complete and concise, both for your benefit and the horses'. Should you have any concerns or queries please contact us.

A Kaimanawa Wild Horse is **WILD**. You cannot expect it to behave like a domesticated or handled horse. Kaimanawa Wild Horses do not know anything about:

- Being left alone without other horses
- Being handled
- Being haltered, tied up, covered or stabled
- Fences of any sort
- Vehicles, people, pets, domestic livestock or other things we may have around.
- Being transported (float or truck)

YOUR APPLICATION WILL REQUIRE YOU TO PROVIDE TWO REFEREES, UNDERGO A HOME INSPECTION, AND PAY AN APPLICATION FEE. ONE REFEREE MUST BE A VET, ANIMAL WELFARE OFFICER OR SIMILAR

Muster

The muster is under the sole control of the Department of Conservation (DoC). Horses are mustered in family groups, usually from specific areas. These areas are decided by DoC from the results of the annual census. The DoC vet decides which horses are suitable for rehoming. Therefore, until this point is reached Kaimanawa Heritage Horses (KHH) does not know what horses will be available for rehoming. Because KHH does not get to choose what horses we are able to offer, we do our best to allocate the horses provided to us to the applicants. The end result of this is that KHH cannot guarantee to supply you with the type of horse you request, or possibly (in the worst case) even supply a horse at all. Ages of horses are only approximate due to drafting procedures and are based on appearance.

Transport

DoC will transport the Kaimanawa Wild Horses from the muster yards to a distribution point. Transport to your yards will be arranged for you by KHH (at your expense) in a suitable truck.

You must state clearly on your application form the exact delivery details of where your yards are situated. Include Rapid/Rural numbers, letterbox colours, anything that will help the truck driver find you easily. Please be aware that due to the time of year it is most likely to be wet and muddy, and a truck needs to be able to get to the loading ramp, turn around, and get back on the road without getting bogged in your paddock.

The truck driver may refuse to unload the horses if he believes the facilities provided are unsafe for the horses, driver, or truck.

Feed, Facilities and Training

You will need good strong cattle yards and a loading ramp with a minimum height of at least 1.8 metres. Sheep yards are **NOT** suitable as these horses can and will jump. You must have a suitably fenced paddock directly off the yards.

Grass, hay and plenty of clean water are required when a horse first arrives. Wild Horses are not used to lucerne or grain feeds. Grain feeds should be introduced slowly. Take care in initial grazing management and feed routines. Consult a veterinarian or KHH if you need advice. We do not recommend the use of hay nets or hay bags.

You must graze your new Kaimanawa horse with, or adjacent to, other horses. These horses have never been alone. Without the company of other horses, it will fret, become stressed, or jump out of the yard, or even just give up on life.

Handling

Mares are likely to be pregnant. It is best to do as little as possible until after she has foaled. Stress is likely to trigger an abortion in pregnant mares. – Once the mare is used to you coming into her yard with hay, water etc, we recommend turning the mare out into a paddock with a paddock mate until she has foaled. Once the foal is old enough, it is a good time to start handling.

Other Kaimanawa Wild Horses can be handled as soon as you feel they can cope - usually within a couple of weeks.

KHH will not transport unhandled horses to the South Island for safety and welfare reasons. Handled horses are able to be transported to the South Island.

KHH may be able to assist you with arrangements to have your new Kaimanawa handled by a third and independent party at your cost if required. Your horses will be delivered directly to the handler. KHH recommends basic skills should be taught such as catch, halter, lead and tie, pick up feet, and load. KHH will not be liable for the actions or costs of horse trainers or transport companies.

Horses must NEVER be tethered.

Stallions / Castration

Young stallions and colts should be gelded as soon as they have been handled enough to be able to undergo this operation. Gelding must be done by a qualified veterinarian.

Stallions can be most difficult to handle. They have been known to break down fences and travel considerable distances. It is a strong recommendation that all stallions are gelded as soon as possible because entire male horses can be unpredictable and dangerous.

KHH does not condone the breeding of your Kaimanawa while there are unplaced horses from the muster being sent to slaughter. KHH offers a rebate of \$75 on receipt of a veterinary certificate for every mustered horse you have castrated, only after the full payment of your horses and transport has been received.

Worms

These horses have high worm burdens and maybe lice-infested when captured. KHH will treat your Kaimanawa with a pour-on wormer before they are delivered to you. It is imperative to treat your Kaimanawa with a broad spectrum wormer as soon as possible because your horse will still be carrying a heavy worm burden. Please check for lice and treat if necessary.

Costs (inc GST)

The price of the **first horse** is \$250.00, and **additional horses** are \$220.00 each. **Mare and Foal** combinations are a special price of \$400 for the first pair and \$370 for additional pairs.

These prices include one-year KHH membership and horse registration.

You will get a \$75 gelding rebate on receipt of a veterinary certificate.

Transport costs are dependent on distance, time, and numbers. Costs are payable directly to KHH. Expect to spend upwards of \$200 per horse, depending on location within the North Island.

The application fee is \$100 and **must** accompany your application for it to be considered. This fee will be deducted from the purchase price of the horse. The application fee is not refundable once KHH has commenced processing your application. It will only be refunded if, due to a shortage of mustered horses, KHH cannot supply you with a horse.

The balance of payment for your horses is due within 7 days of the date of invoice of the horses.

The horses remain the property of the Kaimanawa Heritage Horse Welfare Society until paid for in full, including transport costs payable to KHH. Should you decide not to pay for your horses, KHH reserves the right to uplift the horses supplied to you and to recover from you any costs of debt collection incurred by non-payment of your account **Please note, all prices are GST inclusive.**
